About Me

I'm a software engineer from Argentina. I consider myself a full-stack developer, I usually work in web development and back-end services. I'm also interested in machine learning. I've worked mostly around REST APIs, JVM-powered services, and web development. I enjoy learning new things and comprehending in a better way things that I already do or use. I try to always have a positive attitude, trying to find the root of any issue or problem that may arise.

Other Interest

Playing sports.

Skills

The skill scale is from 0 (Fundamental Awareness) to 5 (Expert).

Job Experience

Present	Senior Software Engineer (Sr)	MuleSoft, Argentina/Buenos Aires
Jul/2021	•	
Jul/2021	Software Engineer (Ssr)	MuleSoft, Argentina/Buenos Aires
	<ul style="list-style-type: none"><li>• Worked on Anypoint's Datagraph in an engineering team following agile methodologies, developing front and back-end services.</li><li>• The product was developed from scratch and maintained in production later on.</li><li>• In conjunction with my team, we developed REST Services using Java and Spring as well as web clients with React, Redux and Typescript.
