About Me ———

I'm a software engineer from Argentina. I consider myself a full-stack developer, I usually work in web development and back-end services. I'm also interested in machine learning. I've worked mostly around REST APIs, JVM-powered services, and web development. I enjoy learning new things and comprehending in a better way things that I already do or use. I try to always have a positive attitude, trying to find the root of any issue or problem that may arise.

Other Interest —

Playing sports.

Skills ———

Web Development

OOP

Functional Programming

The skill scale is from 0 (Fundamental Awareness) to 5 (Expert).

Job Experience

Jul/2022 Senior Software Engineer (Sr)

 Worked on Mulesoft RPA development adapting a legacy codebase to the way of coding in MuleSoft. Worked with Java + Spring microservices that interacted with Postgresql Databases whose migrations where managed by Liquibase. Performed performance and functionality tests as well.

Software Engineer (Ssr)

MuleSoft, Argentina/Buenos Aires

MuleSoft, Argentina/Buenos Aires

- Worked on Anypoint's Datagraph in an engineering team following agile methodologies, developing front and backend services.
- The product was developed from scratch and maintained in production later on.
- In conjunction with my team, we developed REST Services using Java and Spring as well as web clients with React, Redux and Typescript. Developed integration tests using Testcafe.
- Helped and provided guide for junior and intern employees.

Associate Software Engineer (Jr) MuleSoft, Argentina/Buenos Aires

- Worked on the Monitoring Platform inside MuleSoft's Anypoint Platform in an engineering team following agile methodologies, developing front and backend services.
- The product was developed from scratch and maintained in production later on.
- In conjunction with my team, we developed REST Services using Scala, Akka and Java and several types of databases as well as web clients with React, Angular and Typescript. Which where deployed in the AWS cloud via tools such as Terraform, Salt, Spinnaker and Jenkins. For Monitoring purposes, I've worked with the Elasticsearch stack and set up scripts on Python and bash.

Dec/2017

Dec/2017 Software Engineer Intern

MuleSoft, Argentina/Buenos Aires

 Maintained a legacy VCS system and developed new features using Raml, Java, Junit, Spring Framework, Docker and Kubernetes.

May/2017 Dec/2016

Information Technology Teacher

FINES, Argentina/Buenos Aires

- Worked as a teacher in IT for an accelerated highschool course for adults under the FINES plan.
- I planned and gave night classes to both adults and teenagers.

Education

Apr/2016

2019-2020 Postgraduate course
Data Science specialization

ITBA University

2014-2018

Master's Degree Software Engineer Austral University
